

# THE BENEFITS OF EGG DISINFECTION WITH THE HALOFOG

Test results of one year of testing to see the benefits of extra disinfection on hatching eggs at a breeding farm \*

## BETTER PERFORMANCE OF CRACKED EGGS

Eggs disinfected at the breeding farm do not build up bacteria and have less chance of rotting and exploding.

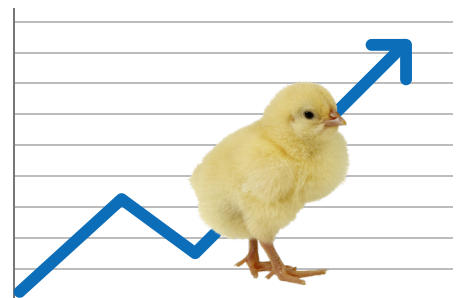

## HIGHER PRODUCTION NUMBER

The HaloFog is a simple to use automatic system which disinfects your eggs in your egg storage room.

## BETTER WEIGHT GAIN

Results show that chicks have a higher weight when they hatch. On top of that they are more active and have a higher end weight.
